Fortuna Cysec's provides unified services with

24x7x365 Monitoring

SOC 2 Type 2 Certified global security operations centers monitor your environment 24x7x365. Security Analysts analyze complex threats and intrusions with faster threat detection and effective and well-defined incident response plan, backed by thorough threat hunting and forensics.

Save 72% Operational Cost

Enhance your security posture with our MDR services leveraging high-performing SOCs and consolidating security tools and processes. On average our customers save about 72% of their spending on their in-house SOC.

Deep Domain Expertise

Our experienced and certified security analysts, incident response teams, and threat intelligence experts act as an extension of your organization, dedicated to defending against evolving cyber threats. Our experts carry several certifications like CISSP, CISM, CISA, CEH, CHP, CHSA, HITRUST CCSFP

Regulatory Compliance

By securing your digital environments and sensitive data we help your organization meet regulatory compliance like NIST, HITRUST, GDPR, GLBA, FISMA, HIPAA

Cost of Building in-house Security Operation Center (SOC)

Setting up an in-house Security Operations Centre (SOC) means implementing the appropriate security tools, intelligence and people together to create an integrated solution that can withstand the test of time. It also needs to scale as quickly as the threat landscape changes.

- Staffing shortage puts organizations at extremely high or medium risk.
- Struggling to keep up with turnovers/attrition.
- Not finding qualified staff
- Not having budgets to match the market rates.
- Not enough time to adequately train each cybersecurity team members

fortuna cysec
Make cybersecurity a part of your enterprise's DNA

Today's digital landscape is laden with cyberthreats, and we provide comprehensive cybersecurity, tailored to your needs managed around the clock, without you having to build an internal team.

Today's Security Landscape & Challenges

- Disparate Tools
- Complete Visibility of Assets
- Manual Correlation

- Alert Fatigue
- Alert Validation and Prioritization
- Manual integration of Threat Intelligence
- Higher MTTD

- Increased Regulatory Compliance
- expensive 24X7X365 SOC Operation
- Security SMEs Retention
- Increased cost YoY

About Fortuna Cysec

Fortuna Cysec, a global cybersecurity company offers organizations enhanced threat detection, automated response, and real-time monitoring vital for cyber defense infrastructure with the advantage of specialized expertise, round-the-clock protection, advanced tools, scalability, cost savings, and the ability to focus on core business activities. Our team of cybersecurity experts

helps with strategy and implementation. Our cybersecurity architects and engineers possess deep domain knowledge based on decades of experience on a variety of platforms.

Partnering with Fortuna Cysec is a strategic way to enhance your overall

People

Our security analysts, incident response teams, and threat intelligence experts act as an extension of your organization, dedicated to defending against evolving cyber threats

Process

Optimize your security with a well-defined incident response plan, backed by thorough audits and assessments. Our SOC utilizes advanced technology and streamlined processes for real-time incident monitoring and response.

Technology

Enhance your network security with our all-in-one platform, integrating intrusion detection, endpoint response, Threat Intelligence, SIEM, and SOAR for comprehensive protection.

Orchestrate your entire cybersecurity services offered in modular packages to choose from based on your organization's security requirement.

Fortuna Cysec's **cybersecurity services** with its SOC2 Type2 certified 24 X 7 X 365 global Security Operations Center (SOC) helps organizations **deploy, configure, and manage** security solutions of leading products on-premises or in the cloud.

Managed Detection & Response Service

Our services are provided as a total outsource or an overflow to your existing SOC. We can customize the engagement scope based on your requirements either in terms of services or hours of operation.

Service Portfolio

Implement, Configure & Manage

- End Point Detection and Response (EDR)
- Identity access management (IAM)
- Intrusion prevention systems (IPS)
- Network Detection and Response (NDR)
- Privileged access Management (PAM)
- Privileged Identity Management (PIM)
- Mobile Device Management (DLP)
- Asset Management
- Email Security
- Cloud Security
- SIEM

Managed Services

- Helpdesk
- NOC Services
- Managed Detection & Response
  - Threat Prevention
  - Threat Detection
  - Threat Intelligence
  - Provocative Hunting
  - Threat Response
  - Incident Management Remediation
  - Case Management, Automation & Playbook creation
  - Reporting
- Managed SIEM
- Managed EDR
- Vulnerability Management
- Patching
- vCISO Services

Professional Services

- Emergency Breach Management
- Forenscics
- Security Risk Assessment - NIST, HIPAA, CIS Controls
- Red/Blue Team Exercises
- Adversary Emulation Exercises
- Penetration Testing
  - Internal & External Application
  - Web Application
  - Mobile Application
  - Wireless Network
  - Social Engineering
  - IoT (Internet of Things)
  - Cloud Penetration Services
- eDiscovery Services
